**Addendum #1
West Virginia Telehealth Alliance Rural Health Care Pilot Program
Request for Proposals of January 20, 2010**

RFP Addenda provide additional information that may be helpful to potential RFP respondents regarding some aspects of the RFP without altering its requirements. Amendments will be issued as requirements change, if necessary.

Item #1 of 1: Additional Information about Community Health Network of West Virginia (CHNWV) WAN Group Topology

Three new diagrams and one new Excel Spreadsheet are available on the WVTA Web Site (www.wvtelehealth.org) that provide additional information about the current and future topology of the CHNWV sites.

- A. "CHNWV-RHCPP Network Architecture-As Is" visually depicts the current network topology;
- B. "CHNWV-RHCPP Network Architecture-To Be" visually depicts the desired future network topology;
- C. "CHNWV RFP Sites" Excel Spreadsheet (Tab #2- CHNWV Bandwidth Requirements) specifies the logical destinations of each circuit as depicted in Diagram B;
- D. "WVTA-CHNWV Metro-fiber WAN diagram" visually depicts how the new WAN services will connect to the Metro-fiber WAN awarded last year.

Service providers have maximum flexibility to meet the "To-Be" topology as they propose various solutions.

These documents A through D only apply to the CHNWV sites within that specific WAN Group.

Thank you. End of Addendum #1.
